### EAS DEPLIANT

### 30 YEARS WITH US

#### THE HEART OF TECHNOLOGY TO GIVE LIFE TO YOUR PROJECTS.

We want to get "into the heart of technology", anticipating the growth of specialisation in the electronics sector by offering a highly qualified service in project industrialization, in assembly, automatic testing of circuit boards and electronic or mechanical assemblies.

In 1978 the first "deed" was made for this company who is now nationally acknowledged as a foremost industrial organisation. All this is thanks to the high motivation of its founder Giorgio Geronazzo, with his constancy and commitment over the years in supporting this remarkable growth. Our sincere thanks to everyone who, over these 30 years, has contributed towards this success, enabling EAS to become a reference in the heart of technology.

#### 30 YEARS WITH US...

COMPANY WITH QUALITY SYSTEM CERTIFIED
